2015 Anesthesia for Global Outreach Course, May 28-31, 2015, Halifax, NS
Hosted by Dalhousie University. The first of its kind in North America (and one of only three offered worldwide), the *Anesthesia for Global Outreach Course* is an annual four-day course that focuses on novel techniques and equipment for delivering anesthesia care in underserviced environments – the conditions under which 80% of the world's anesthesia care is delivered. The course also boasts a cadre of world-renowned experts in global health and anesthesia.

By the end of the course, *Anesthesia for Global Outreach* participants can expect to:
• Recognize and demonstrate the knowledge of anesthetic techniques likely to be encountered in low resource settings

- Learn the preparations needed to safely work in austere conditions specific to the practice of anesthesia including intellectual, technical, ethical, and attitudinal factors
- Discuss and demonstrate various means of delivering educational programs in resource-poor environments such as the use of simulation to practice clinical and technical skills and care delivery
- Discuss the psychological and ethical adaptations that occur when working in an austere practice environment
